

Recommended UDA Strategy from Confidence-Error Diagnostics

UDA component	Recommendation	Evidence	Risk
Consistency-only	Recommended baseline	Uses unlabeled real data without trusting noisy labels	Low
Pseudo-labeling: mouth	Use early	Top-25 NME 2.6% , failure 5.8%	Moderate
Pseudo-labeling: eyes	Use later / strict	Top-25 NME 3.9% , failure 19.2%	Medium
Pseudo-labeling: nose	Use later / strict	Top-25 NME 3.2% , failure 21.9%	Medium
Pseudo-labeling: eyebrows	Delay / exclude	Top-25 NME 5.4% , failure 48.5%	High
Pseudo-labeling: contour	Exclude initially	Top-25 NME 7.4% , failure 64.1%	Very high
